## Academic History

### Vellore Institute of Technology - AP

2019 - 2023

B.Tech | Computer Science with

Network Security | Score: 9.09 CGPA (till 3rd year)

### Sri Chaitanya Junior Kalasala

2017- 2019

Intermediate | MPC | Score: 97.2%

### Kendriya Vidyalaya Tirumalagiri

2016 - 2017

Class 10 | CBSE | Score: 10 C.G.P.A

## Skills & Technologies

### - Web Development

HTML, CSS, JavaScript, PHP, SQL, jQuery, Bootstrap, AJAX

### - Machine Learning, Deep Learning

### - Oracle Cloud Infrastructure

### - Programming Languages

Java, Python, R

## Languages Known

- English      - Hindi      - Telugu

## Certifications

- HTML, CSS and JavaScript for Web Developers

- Building Web Applications in PHP

- Introduction to SQL

- Network Security & Database Vulnerabilities

- Introduction to Cyber Security Tools & Cyber Attacks

- Oracle Cloud Infrastructure Foundations Associate

## About Me

I am currently a student at VIT-AP pursuing my Bachelor's Degree in Computer Science with Network Security. I was the Technical Lead of the GPUG Club and Web Development Lead of QHUB Club in VIT-AP. I love to learn and explore new technologies and advancements in the field of Computer Science.

## Work Experience

### Web Development Lead

**QHUB Club VIT-AP | October 2021 - July 2022**

- Developed the landing page for the club which will significantly increase the club reach and will help in marketing the club online.

### Technical Lead

**GPUG Club VIT-AP | July 2021 - July 2022**

- Conducted and managed Technical Events, Seminars and Competitions where we developed custom web applications with 500+ participants in every event.

### Python for AI/ML Intern

**Elite Techno Groups | August 2021 - September 2021**

- Worked with the ETG team to research various opportunities in the domain. Learned the technical concepts, industrial applications involved in Machine Learning and Artificial Intelligence. Worked on various projects and prepared result reports as per the requirement.

### Web Development Intern

**The Sparks Foundation | January 2021 - February 2021**

- Developed a basic banking website using HTML, CSS, Bootstrap in frontend and PHP, MySQL in the backend that helped in transactions between multiple users with acknowledgment.

## Projects

### GPUG Club Website

<https://gpug.in/>

GPUG-VITAP website to familiarize students with GPU technology, keep them informed about our upcoming events and to conduct webhunts. The technologies used are HTML, CSS, Bootstrap, JavaScript, jQuery in frontend and PHP, MySQL in the backend using AJAX.

### iDiscuss (Technical Coding Forum)

<https://idiscussforums.epizy.com/>

This is a technical coding forum website in which people can interact and resolve technical queries along with personalized chatting. The technologies used are HTML, CSS, Bootstrap in frontend and PHP, MySQL in the backend.

### Dine & Cheer Restaurant Website

<https://dineandcheer.epizy.com/>

This is a full stack restaurant website in which customer can order in his favourite delicacies to be delivered to him. There is also an admin panel in which the restaurant owner can manage the orders, order status and can see the customer reviews. The technologies used are HTML, CSS, Bootstrap in frontend and PHP, MySQL in the backend.

### Python and Machine Learning Projects

<https://github.com/krishnadheerajp/ETG-ML-AI-Skill-India-Internship>

This git repository consists of various projects made during the internship like Inventory Management System, Analysis of US Cars Data and Summer Olympics Data and an ANN model to detect Breast Cancer.
